

# FAG Innovation - keeping the world moving

Our OE CV program includes tapered roller bearings, Insert Units, Repair Insert Units and Hubs, as well as a complete range of seal kits.

## Insert Unit (IU)

Simple Design and long Faultless service life

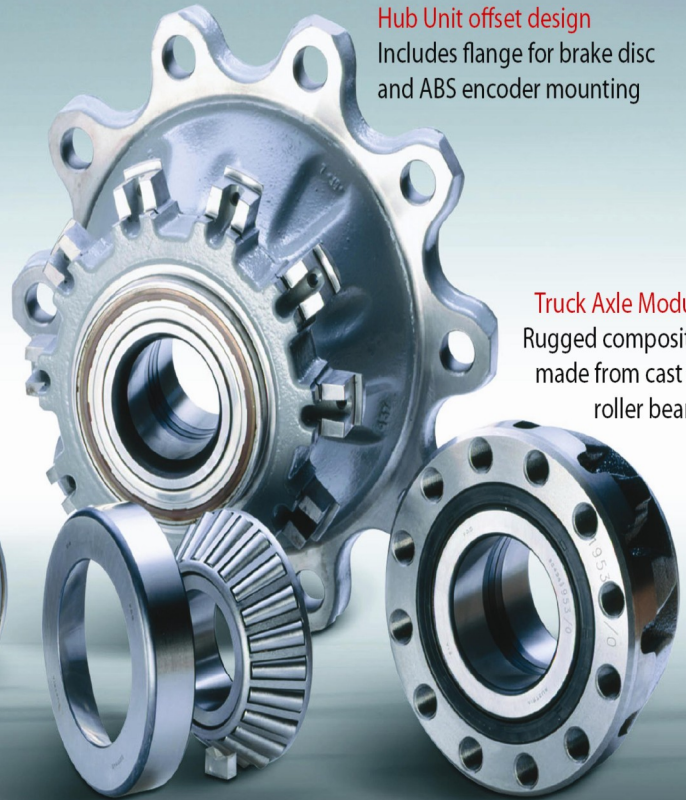

## Truck Hub Unit (THU)

Easy and fast replacement thanks to bearing unit assembly

## Hub Unit offset design

Includes flange for brake disc and ABS encoder mounting

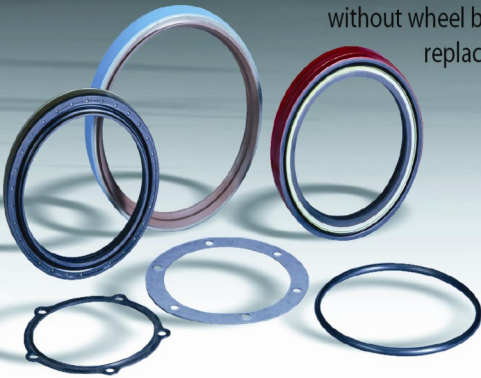

## Truck Axle Module (TAM)

Rugged composite design made from cast iron and roller bearing steel

## Seals

In kits, ideal for brake repair without wheel bearing replacement

## Tapered Roller Bearings (TRB)

High load bearing capacity, little installation space, good cornering Behaviour

## Repair Insert Unit (RIU)

Time and cost effective replacement, easy trouble-free installation, pre-assembled and lubricated

## Repair Insert Unit - a breakthrough for economy and convenience

The Repair Insert Unit (RIU) is a pre-assembled and lubricated, sealed wheel bearing replacement.

- \* Avoids the cost of complete hub
- \* Time and cost efficient replacement
- \* Easy, trouble-free mounting
- \* Pre-assembled and lubricated
- \* Complete with fitting tool
- \* Technical Brochure and mounting instructions
